

CASE STUDY

Dr. Badeia Morsy is a solo provider practice based in Pleasanton, CA, with 3 users and 1 location, specializing in internal medicine.

Dr. Morsy purchased Patient Chart Manager (PCM) in February of 2011.

“Our office did a lot of research as to which EHR system would best suit our needs. Upon coming across Prime Clinical; your company was the best fit for our office.

Starting PCM in our practice was difficult at first, but with all the help from the Prime Clinical staff it was a breeze. Whenever we had a question or concern, the staff was always easily reachable.

We were able to create templates and macros to make it easier to chart progress notes. We were also able to upload all of our forms quickly and efficiently.

With this software we have become more efficient in our everyday workload, improving the accuracy of coding, charting, filing and quality patient care.

I have attested for Meaningful Use and have received my first incentive check.”
