

## CASE STUDY

We have been using Prime Clinical Systems software solutions since 2006. We appreciate the hard work and effort put in by your staff to make this Electronic Health Record system function for not only our practice but all of the other clients out there. Prime Clinical's staff work diligently to keep the program current and answer any questions or problems we may have.

We are very happy that we had the capability to meet the criteria for the E.H.R incentives for both Medicare and Medi-Cal. The system is flexible enough that we were able to adapt it to our needs with templates, integration with other sources such as outside laboratories and radiology, and tests that are done in the office such as ECG, PFT, and, 24 Hour Holter Monitors.

The intellect system for billing is also good. It is efficient for scheduling and billing. We are also able to customize it to our needs with statements, super-bills, and reports. Heidi the billing manager says "it helps my job to be smooth and efficient."

Sincerely,

***Dr. Tushar Modi***
